

Supported Spindle

BUYER'S GUIDE

- ☐ Does the spindle length work for you, your bowl, and where you prefer to spin?
- ☐ How strongly do you have to flick to set the spindle in motion?
- ☐ When you flick the spindle, how fast does it spin?
- ☐ How long does each flick last?
- ☐ Can the spindle also be used suspended as well as supported?
- ☐ How well balanced is the spindle as it spins? Does it wobble?
- ☐ Will the spinning tip work with your intended bowl?
- ☐ How does the flicking tip feel in your fingers?
- ☐ If the shaft appears to be a denser material than the whorl, does it impact how the spindle spins?
